Question

Can Pedersoli move the rear sight on the reproduction of the 1857 Württembergischen rifle closer to the muzzle, further from the aiming eye of the shooter?

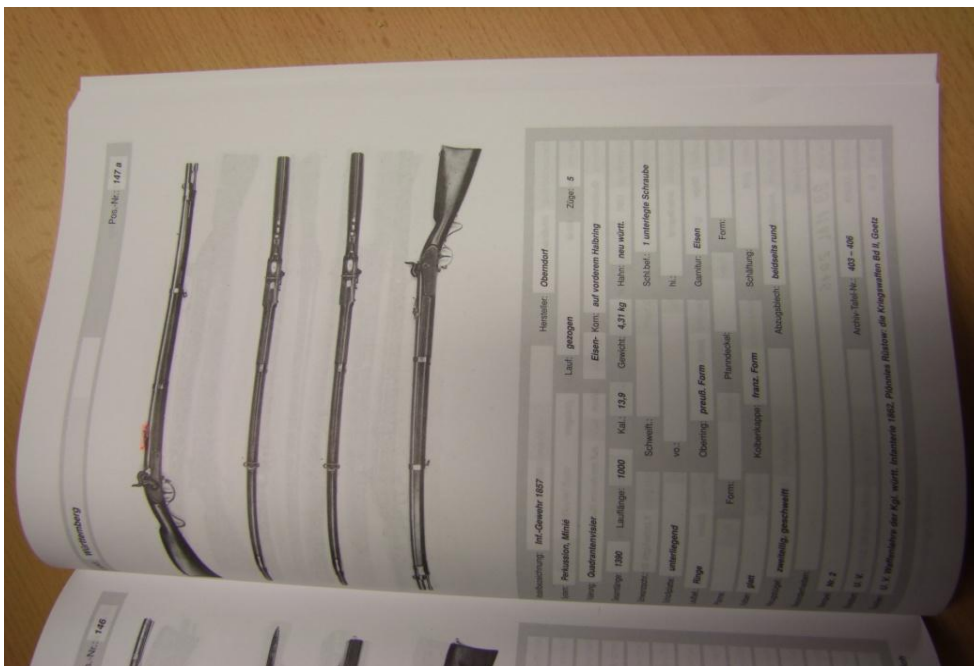

Remarks

Sometime in the years of production Pedersoli moved the rear sight on the 1857 Württembergischen rifles further towards the muzzle to ease aiming. This modification is not acceptable. The sight must be placed to the original position on these reproduction rifles.

Case falls under the amnesty till 31 December 2020.
